

DESCRIPTION

Feature:

- 1.MA, MB, MC phase, motor U, V, W
- 2.VCC GND external DC power supply line
- 3.SC pulse signal output
- 4.Rotation Direction Jumper
- 5.VR speed signal input, the general external 100K tripod middle pin potentiometer VR the remaining two feet 5V and GND main board.

Specifications:

Working voltage: 5-36V

Maximum current: 16A

Maximum power: 350W

Over current protection

Size: length 63mm x width 45mm x height 27mm

Package included:

1PCS x BLDC Three-Phase Brushless Motors Controller With Hall/NO Hall DC
5-36V 350W Brushless Sensor Motor Driver Module
